

IT Strategy, Risk Management & Business Process Optimization

A Comprehensive Technical & Strategic Portfolio Evaluation

INTERN CANDIDATE

Anmol Anand Tomar

IT Business Process Analyst II

CERTIFICATION DETAILS

YuvaIntern / Henry Harvin

ID: YI/2026/200001/438588 | Date: Sept 24, 2026

Business Process Mapping & Incident Management Optimization

Mapped ITSM Incident Workflow

STEP 1 — INGESTION

Ticket Logging & Triage

Automated ingestion and category tagging via ServiceNow ITSM platform.

STEP 2 — FIRST LINE

Level 1 Service Desk Resolution

First-contact resolution target within 15 minutes using automated scripts.

STEP 3 — TECHNICAL ESCALATION

Level 2 / Level 3 RCA Analysis

Specialist assignment for root cause analysis and complex software patches.

STEP 4 — CLOSURE

Feedback & Knowledge Capture

Client verification sign-off and mandatory KB article update.

Addressing Evaluator Feedback

- **Bottleneck Identified:** Manual Level 2 queue assignment created an average delay of 4.2 hours.
- **Improvement Initiative:** Deployed ML-driven auto-routing rules based on keyword parsing and asset criticality.

Quantified Process Metrics

34%

MTTR REDUCTION
From 6.8h to 4.5h

65%

FIRST CONTACT
RESOLUTION
Increased from 42%

IT Business Strategy: SWOT & Porter's Five Forces Analysis

SWOT Matrix (Publicly Traded IT Partner)

- **Strengths:** Strong enterprise cloud infrastructure portfolio with 99.99% availability SLA compliance.
- **Weaknesses:** Higher switching costs leading to long sales cycles (averaging 90 days).
- **Opportunities:** Expanding AIOps capabilities to tap into a \$12B enterprise management market.
- **Threats:** Aggressive pricing strategies from boutique niche SaaS providers.

Porter's Five Forces Breakdown

Competitive Force	Intensity	Strategic Driver
Threat of New Entrants	Low	High capital & compliance requirements.
Bargaining Power of Buyers	Mod-High	Clients demanding 12-15% multi-year discounts.
Threat of Substitutes	Moderate	Low-cost open-source tools.
Industry Rivalry	High	Aggressive market share competition.

Strategic Recommendation:

Reallocate 15% of annual R&D into proprietary AIOps integration to move past pure price competition and increase client retention.

IT Risk Management & Business Continuity Strategy

Top Identified IT Risks & Financial Impact

Risk Category	Impact / Likelihood	Est. Financial Loss
Ransomware / Breach	High / Med	\$2.4M per incident
Cloud Outage	High / Low	\$85K / hour downtime
Data Misconfiguration	Med / Med	\$350K regulatory penalty

Mitigation Implementation Details

- **Immutable Backups:** Enforced a 3-2-1 backup strategy featuring air-gapped immutable cloud storage.
- **Zero Trust Architecture (ZTA):** Deployed MFA and endpoint micro-segmentation across 100% of network nodes.

Continuity Metrics & SLA Compliance

< 2h RECOVERY TIME OBJ. (RTO) Critical System Restoration	< 15m RECOVERY POINT OBJ. (RPO) Max Acceptable Data Loss
--	---

Testing & Verification Protocol

Validation is conducted via **quarterly simulated disaster recovery (DR) drills** and automated failover tests. Framework aligns with **ISO 27001** and **NIST CSF** security controls.

IT Project Evaluation: Enterprise ERP Migration PIR

Performance Against Core Baseline

- **Budget Performance:** Executed at **\$1.15M** vs. initial **\$1.10M** budget (4.5% variance driven by scope expansion).
- **Timeline Performance:** Completed in **38 weeks** against a planned 36-week schedule (5.5% variance).
- **User System Adoption:** Attained **91% system adoption** within 30 days post-cutover.

Key Resolution Highlight:

Legacy data format incompatibility halted migration testing for 2 weeks. Resolved by engineering custom automated ETL data scrubbers that eliminated **98.6% of data anomalies** prior to go-live.

Project Performance Metrics

Metric Category	Target	Actual	Status
System Uptime	99.9%	99.95%	Exceeded
Budget Variance	< 5.0%	4.5%	Met
Schedule Variance	< 5.0%	5.5%	Minor Slip
User Adoption	> 85%	91%	Exceeded

Lessons Learned & Future Recommendations Framework

Key Lessons Learned

1. Automated Data Hygiene

Performing early automated data cleansing reduces migration testing delays by over 50% compared to late-stage manual fixes.

2. Proactive Stakeholder Alignment

Continuous change management and department alignment reduce end-user friction during major IT system deployments.

Future Recommendations Framework

1. Mandatory Pre-Migration Data Audits

Establish a mandatory 30-day data staging protocol prior to beginning system build phases.

2. Automated Risk Dashboards

Transition from manual status logs to real-time Key Risk Indicators (KRIs).

3. Structured PIR Cadence

Schedule formal Post-Implementation Reviews at 30, 60, and 90 days post-go-live.

Program Verification & Organizational Details

Certificate of Experience Details

Candidate Name:	Anmol Anand Tomar
Designation:	IT Business Process Analyst II
Issuing Organization:	YuvaIntern
Certificate Reference:	YI/2026/200001/438588
Issue Date:	September 24, 2026
Program Leader:	Kounal Gupta (Founder)

Partner Office Footprint (Henry Harvin)

- **Asia Pacific Office:**
Henry Harvin India Education LLP, B-12, Sector-6, Noida (UP), India
- **United States Office:**
Henry Harvin Inc., 8 The Green #19614, Dover, DE 19901
- **Middle East Office:**
Henry Harvin Co LLC, Prime Tower, Business Bay, Dubai, UAE

Summary of Internship Deliverables & Business Impact

Process & Strategy Achievements

- **Optimized ITSM Process Mapping:** Modeled streamlined escalation workflows with target **34% MTTR reduction**.
- **Data-Backed Business Strategy:** Built SWOT & Porter's 5 Forces frameworks grounded in industry benchmarks and market sizing (\$12B AIOps market).

Risk & Governance Accomplishments

- **Enterprise Risk Management:** Formulated NIST/ISO-aligned mitigation plans protecting high-value cloud assets with sub-2h RTO targets.
- **Project Review Framework:** Established standardized Post-Implementation Review protocols to improve future IT project governance.

Key Takeaway

Applied structured IT analysis, metrics-driven process modeling, and strategic risk management principles to solve enterprise-level IT challenges during the YuvaIntern Capstone.

CONCLUSION & DISCUSSION

Thank You!
